

Interplex Manufacturing Facilities Operation Updates

23 March 2020

Our operational plans may be adjusted as we adhere to local and regional government orders which may cause temporary closure of some of our manufacturing facilities. During any manufacturing facility closure, we will assign a specific point of contact who will respond to any concerns or questions. As this is a fluid situation, we will be monitoring each facility and will continue to provide updates on our corporate website - www.interplex.com.

We will continue to work closely with the local government authorities to mitigate and minimize any possible disruptions, as well as to make requisite arrangements to cater for the necessary staff strength to carry out our operations.

The health and safety of our employees are paramount, and we have taken preventive and proactive measures to safeguard their well-being. In addition, to minimize the risk of infections, we have also restricted our staff from all non-essential travels. We will remain vigilant and continue to take necessary precautions to protect the health and well-being of our employees.
